

Happy Birthday to:
Audrey R3, James 1P,
Eshaal 2Q, Oscar 2R
and Lujain 1Q

Can I please remind parents/carers to have their child in school **no later than 8.45am**. Parents/carers are still dropping their child off after 8.50am and your child is missing the input of their first lesson. The register and dinner register have to be taken before the lessons can start. **It is important that your child does not arrive later than 8.45am** as they will miss giving their dinner choice and the start of their lessons.

The school gate opens at 8.15am.

Year 2Q visit to Forest School

Year 2 had an enjoyable time in Forest School this week even though the children got really wet.

Well done to Jonah 2Q achieving his San Mon (3rd Mon) grading in Ninjitsu

After School and Breakfast Club Notice to present Reception and Year 1 Parents/Carers

If you would like your child to attend After School or Breakfast Club in September it is important that you complete and **return the form which is attached to the newsletter and return it to Mrs Fraser by Friday 21st May.**

After School Club Request Form

Child's Name : _____

Date of Birth: _____

If you would like your child to attend After School sessions it is important that you complete and return this form. We are expecting demand to be high and would encourage you to request your sessions early as places are limited.

The cost for the care will be as detailed below. Once your sessions have been confirmed, please be aware **you must pay for the requested sessions for the whole term** whether your child attends After School or not. You will be able to pay for the sessions by Parent Pay or by using childcare vouchers. Payments should be made for at least one month in advance. Please note that if your account falls into arrears the school reserves the right to suspend your After School Club provision until the arrears are paid in full. You may continue to be liable for charges in your absence, and this will jeopardise any future place allocations You will be able to request changes prior to the start of a **new term** but, please be aware it will **not be possible** to change sessions **during a term**. Any requests for changes must be put in writing.

The school reserves the right to pass on additional costs to parents where additional staff are required to provide specific assistance to individual (or groups of) pupils which are not included in the basic charges. Such costs will be identified to those parents in order that they may make an informed decision as to whether or not they wish to continue with the provision.

Please tick to indicate the sessions you would like to register for:		Monday	Tuesday	Wednesday	Thursday	Friday
After School club Sessions	Cost

Head lice - Treating head lice

Head lice can be difficult to treat due to the time-consuming and precise nature of treatment and high re-infestation rate.

In the past, traditional insecticides were used to treat head lice infestations but head lice would often develop resistance to them.

Therefore, these types of treatments have virtually been replaced with silicone and oil-based preparations which have a physical rather than a chemical action on lice.

After a head lice infestation has been confirmed you can treat the lice at home by wet combing the hair with a head lice comb or by using a lotion or spray that's designed to kill head lice (see below).

However, neither will protect against re-infestation if head-to-head contact is made with someone with head lice during the treatment period.

Wet combing

The wet combing method involves removing the head lice by systematically combing the hair using a special fine-toothed comb.

The comb's teeth should be spaced 0.2-0.3mm apart. Lice can be crushed or trapped between the teeth of nit combs with a tooth spacing of less than 0.19mm and remain unseen.

You can buy a fine-toothed comb from your local pharmacy or you can order one online.

Lotions or sprays don't need to be used for wet combing. However, to be effective, wet combing needs to be carried out regularly and thoroughly. The method you should use is described below.

- Wash the hair using ordinary shampoo and apply plenty of conditioner, before using a wide-toothed comb to straighten and untangle the hair.
- Once the comb moves freely through the hair without dragging, switch to the louse detection comb. Make sure the teeth of the comb slot into the hair at the roots, with the bevel-edge of the teeth lightly touching the scalp.
- Draw the comb down to the ends of the hair with every stroke, and check the comb for lice.
- Remove lice by wiping or rinsing the comb.
- Work methodically through the hair, section by section, so that the whole head is combed through.
- Rinse out conditioner and repeat the combing procedure.
- Repeat the procedure on days three, six, nine, 12 and 15, so that you clear young lice as they hatch, before they have time to reach maturity.

How long it will take to comb your child's hair will depend on the type of hair they have and its length. For example, short, straight hair can be quickly prepared and can be fine-toothed combed in a few minutes. Longer, curlier hair will take longer to comb.

Lotion or sprays

Using a lotion or spray is an alternative method of treating head lice. However, to be effective they need to be used correctly. Your pharmacist will be able to recommend an over-the-counter lotion or spray and advise you about how to use it correctly.

A lotion or spray should only be used if a living (moving) head louse is found. Crème rinses and shampoos aren't thought to be effective and therefore aren't recommended.

Ensure you have enough lotion or spray to treat everyone in your family who's affected. Use enough to coat the scalp and the length of the hair during each application.

Follow the instructions that come with the lotion or spray when applying it. Depending on the product you're using, the length of time it will need to be left on the head may vary from 10 minutes to eight hours.

The normal advice is to treat the hair and repeat the treatment after seven days. Some products also supply a comb for removing dead lice and eggs.

Some products may be capable of killing eggs as well as lice, although there's no certainty of this. Check for baby lice hatching from eggs three to five days after using a product and again 10-12 days afterwards.

At least two applications of lotion are needed to kill lice over the hatching period because the lotions don't always kill louse eggs.

If the lice appear unaffected by the product, or if the problem persists, seek advice from your school nurse, health visitor, pharmacist or GP.

Cautions

Always read the instructions on the pack or leaflet that comes with a head lice treatment, particularly in relation to the following groups:

- young babies (under six months old)
- pregnant women
- people with asthma or allergies

If you're still unsure, seek advice from a healthcare professional before using the product.
